

Compaction Container

Compactor Containers are suitable for many applications in the Industrial, Commercial and Institutional Sector.

Compactor Containers are suitable for many applications in the Industrial, Commercial and Institutional Sector. Teamed with stationary compactors our containers are designed to receive high volume waste applications in such places as warehouse facilities, grocery stores and hospitals. The container capacity is manufactured for 40 cubic yards, 20' length, 82" inside wall height. These containers are suited for most stationary compactor application and ideal for haulage.

COMPACTOR CONTAINER

ITEM HEAVY DUTY F

Capacity in Cubic Yards 40 ydL
